

Courthouse Streetscape Project

The Board identified the redevelopment of the Courthouse Area as a priority in its adopted Redevelopment Plan. One component of the Redevelopment Plan is the implementation of the Courthouse Streetscape Project (also known as the Courthouse Area Enhancement Project). Phase IA of the Project will construct improvements on publicly-owned properties in the Courthouse area, including the George L. Gordon, Jr., Government Center Building and the School Board's Alvin Y. Bandy Administration Building. These improvements include construction of sidewalks (brick and/or paver); lighting; landscaping (trees along the street); a pedestrian plaza in front of the Courthouse; retaining and landscape walls; and other related improvements. The Project includes demolition of existing sidewalks, and construction of necessary storm drainage facilities.
